Included in the Investment in securities category investment in an insurance entity that is risk weighted rather than deducted from eligible capital. This, if deducted will reduce the eligible capital to BD 626.1 million.

Entity	Country of Domicile	Ownership %	Risk weighted asset	Regulatory capital required 14.0%
Bahrain Kuwait Insurance Company B.S.C. "BKIC"	Bahrain	6.82%	3.6	0.5

* The Bank is currently using the Basic Indicator Approach, whereby the operational risk weighted exposures and regulatory capital requirement are calculated by applying an alpha co-efficient of 15 percent to the average gross income for the preceding three financial years adjusted for exceptional income. The amount of adjusted average gross income for the six months ended 30 June 2025 is BD 146.1 million.

Credit Risk Mitigation and Collateral Valuation Policy

BBK employs a range of techniques to mitigate risk in its credit portfolio. Credit risk mitigation includes an objective assessment of the counterparty's capacity and willingness to meet its commitments in the normal course. The Bank strives to optimize facility structure, collateral, lending covenants, terms and conditions.

The Bank maintains detailed policies and procedures for valuing collateral/securities offered for various credit facilities. The collateral is valued, at minimum, quarterly or annually, based on the type of security. More frequent valuations are also considered if warranted by market volatility and declining trends in valuations are observed. The collaterals and support include mortgages, cash collaterals, marketable securities, personal and corporate guarantees and guarantees from sovereigns and financial institutions. The basis of valuation for different types of securities such as equity, debt, and real estate is also clearly defined in the policies.

Loans restructured during the period	41.5
Impact of restructured facilities and loans on provisions	1.9

The above restructurings did not have any significant impact on present and future earnings and were primarily extensions of the loan tenor, revisions in interest rate, and additional collateral received.

14 . Market Risk Disclosures for banks using the Standardized Approach (SA) for trading portfolios

The group has adopted the standardized approach for calculating market risk capital charges. The table below presents the capital charges as of 30 June 2025.

Asset class	Capital Charge		
	Amount	Maximum	Minimum
Foreign exchange	0.33	0.38	0.09
Interest rate	0.13	0.43	0.09
Total minimum capital required for market risk	0.46		
Multiplier	12.50		
Market risk weighted exposure under the standardised method	5.69		

BBK maintains a prudent approach to Manage Market Risk exposures guided by Market Risk Policy and Procedure. The Position, Stoploss and VaR limits are monitored by Treasury Middle Office (reporting to Risk and Credit Management Department and Independent of Business unit) and a daily risk report is circulated to the Senior Management.

In addition to the above, the Treasury Middle Office also carries out valuation of the Investment Portfolio independently as per the internal policies and procedures. Furthermore, BBK also conducts Stress Testing and Back Testing of Market Risk positions.

21 . Net Gain on Equity Instruments

Realised losses in retained earnings	0.3
Unrealised gains in CET1 Capital	6.7

22 . Legal Risk and Claims

Legal risk is the risk relating to losses due to legal or regulatory action that invalidates or otherwise precludes performance by the end user or its counterparty under the terms of the contract or related netting agreements.

The Group has developed sufficient preventive controls and formalised procedures to identify legal risks so that potential losses arising from non-adherence to laws and regulations, negative publicity, etc. are avoided. The Group also has well established legal procedures to scrutinize product offerings and manage risks arising out of its transactions.

As at 30 June 2025, there were legal suits pending against the Group of BD 4.62 million. Based on the opinion of the Head of Legal Department, the risk that is likely to arise from these suits is remote.

23 . Interest Rate Risk in the Banking Book (IRRBB)

An increase of 200 basis points in interest rates, with all other variables held constant, will result in a negative impact on equity of approximately 11.8%.

Similarly, a decrease of 200 basis points in interest rates, with all other variables held constant, will result in a positive impact on equity of approximately 11.8%.

24 . Leverage Ratio

In November 2018, the Central Bank of Bahrain (CBB) issued its final Leverage regulation, with an effective date of 30 June 2019. The leverage ratio is a simple ratio that serves as a supplementary measure to the risk-based capital requirements. It aims to constrain the build-up of leverage in banking sector, reinforce the risk-based requirements with a simple non-risk based “backstop” measure, and serve as a broad measure of both the on and off-balance sheet sources of bank leverage.

The leverage ratio is measured as Tier 1 Capital divided by Total Exposures. Total Exposures consist of on-balance sheet, off-balance sheet, derivatives and securities financing transactions exposures. As per CBB regulations, Bahraini banks must meet a 3% leverage ratio minimum requirement at all times, except for Domestic Systemically Important Banks (DSIBs), where the minimum ratio is higher at 3.75%. Accordingly, as a DSIB bank, the minimum ratio applicable for BBK is 3.75%. As of 30 June 2025, the leverage ratio for BBK stood at a healthy position of 12.92%.
